

Families Have Saved Up To 50% On Heating Costs And never have to buy fuel — wood, oil, gas, kerosene — ever again!

Hydro-Sil is a unique room-by-room heating system that can save you **hundreds of dollars** in home heating costs by replacing old and inefficient heating. It can replace or supplement your electric heat, gas or oil furnace and woodstoves.

Hydro-Sil represents economy in heating: inside the heater case is a sealed copper tube filled with a harmless silicone fluid. **It's permanent. You'll never run out.** "Hydro-Sil Energy Star" thermostat controls a variable watt hydro element that is only being supplied a proportional amount of power on an as-needed basis. When Hydro-Sil is turned on, the silicone liquid is quickly heated, and with its heat retention qualities, continues to heat after the Hydro element shuts off. Hydro-Sil's room-by-room "Energy Star" digital control technology greatly increases energy savings and comfort.

Proportional "Energy Star" thermostat!

Lifetime Warranty

Your Benefits with Hydro-Sil:

- Slash heating cost with Energy Star tech.
- Lifetime warranty. No service contracts
- Safe, complete peace of mind
- Clean, no fumes, environmentally safe
- U.L. listed
- Preassembled — ready to use
- No furnaces, ducts, or chimneys
- Portable (110V) or permanent (220V)
- Whole house heating or single room

"Consistently ranked #1, it's like a 2.4 mile security blanket" —Men's Journal

"Passport 8500, with its high-sensitivity, state-of-the-art POP mode, small size, and high-quality construction, remains at the top — the highest level of radar and laser protection mated to the best user interface"

—Motor Trend, 2004

The Expert's Choice: Passport 8500 X50

The radar detector experts are unanimous. Test after test, review after review, year after year, Passport comes out on top. Our new Passport 8500 X50 provides unbeatable range on all laser and radar signals (including new "POP" radar) while virtually eliminating false alarms. We also include a travel case and SmartCord at no extra cost. Now you can test-drive "The World's Best" for 30 days at no risk. Call toll-free today.

PASSPORT 8500 X50 \$299.95 with red display (+S&H • OH res add 6.5% tax)
\$339.95 with blue display

HOW 2.0

5 THINGS...

YOU SHOULD KNOW ABOUT SAVING MONEY ON AN HDTV

1 BIGGER ISN'T BETTER

Before you splurge on a monster screen, measure how far you'll sit from it. Too close, and you'll see individual pixels. Choose a TV with a diagonal screen size that is between one half and two thirds the distance from your eye to the set.

2 NOT ALL HDTVs ARE FLAT

High-def CRTs cost hundreds of dollars less than flat panels and offer superior color and brightness. If you need to go flat, prices on LCDs 32 inches and under have dropped 35 to 50 percent in the past year. Online retailers such as ecost.com frequently offer them for less than \$1,000.

3 FORGET THE TUNER

"Integrated" HDTVs come with built-in tuners that pick up free over-the-air high-def channels, but if you have cable or satellite, go with an "HD-ready" set instead and get your HD content through your provider's set-top box. Just make sure your TV has an HDMI input, which will most likely be the only way to get high-def from next-generation DVD players.

4 KNOW THE NUMBERS

Although 1080p is the best display resolution available, 1080p content is still scarce, so opt for a 720p (flat-panel) or 1080i (CRT) set. HD broadcasts in either resolution will render well on either set. Just avoid 480p, or EDTV, which is not high-definition.

5 CALIBRATION IS WORTH IT

Vendors often ship TVs with off-the-chart brightness and color settings that need fine-tuning. For a few hundred dollars, you can hire a pro or pay the dealer to calibrate your set. Or just do it yourself using a calibration DVD and filter, available for \$25 at videoessentials.com. —KATE ASHFORD
